Energy Issues  
March 11th, 2022

In light of the ongoing tensions with the war in Ukraine, do you believe the United States should continue to work towards becoming energy independent and not rely on foreign sources to meet our energy needs?

## Critical Crosstabs:

### By Gender

Environmental activists are calling on the Biden Administration to shut down the Dakota Access Pipeline that has been bringing oil safely from North Dakota to U.S. markets for more than four years. Shutting down the pipeline would likely increase the cost of gasoline and would increase our nation's reliance on oil from the Middle East. Do you believe the Dakota Access Pipeline should be shut down?
