Energy Issues
February 18th, 2022

Do you believe the United States should continue to work towards becoming energy independent and not rely on foreign sources to meet our energy needs?

Transporting oil and natural gas by pipeline is safer than by truck or train, and alleviates bottlenecks in the trucking and rail industries, easing the supply chain and making transporting food and other goods less costly. Knowing this, do you support the use of pipelines to transport oil and natural gas?

Environmental activists are calling on the Biden Administration to shut down the Dakota Access Pipeline that has been bringing oil safely from North Dakota to U.S. markets for more than four years. Shutting down the pipeline would likely increase the cost of gasoline and would increase our nation's reliance on oil from the Middle East. Do you believe the Dakota Access Pipeline should be shut down?
